KIT 01

Kit di fissaggio per maniglione singolo non passante per porte in legno

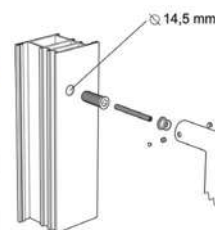

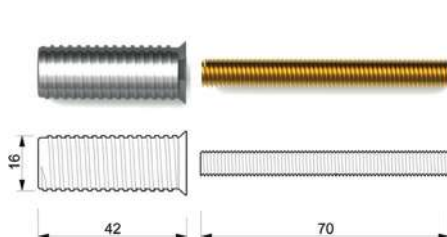

Fixing kit for single pull handle for wooden doors

Montageset für Stoßgriff einzeln ohne Durchgangsbefestigung für Holztüren

Kit de montage pour poignée de tirage individuel fixation en facade pour portes en bois

€ 8,00

KIT 02

Kit di fissaggio per maniglione singolo non passante per porte in alluminio doppia camera

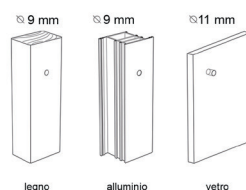

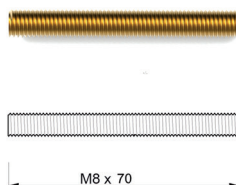

Fixing kit for single pull handle for aluminium doors double chamber system

Befestigungsset für Stoßgriff einzeln ohne Durchgangsbefestigung für Aluminiumtüren 2-Kammer System

Kit de montage pour poignée de tirage individuel traversant pour portes en aluminium double chambre

€ 12,00

KIT 04.94

Kit di fissaggio maniglione singolo con perno passante e boccola di bloccaggio per porte in legno, alluminio, vetro

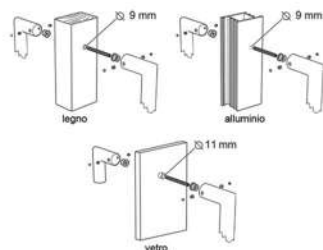

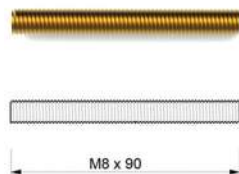

Fixing kit for single pull handle with through bolt and lock bushing for wooden, aluminium glass doors

Befestigungsset für Stoßgriff einzeln mit Durchgangsschraubung Blockbolzen und Spannhülse für Holz-, Aluminium-, Glastüren

Kit de montage pour poignée de tirage individuel avec tige d'assemblage et rosace de blocage pour portes en bois, aluminium, verre

€ 18,00

KIT 05

Kit di fissaggio per coppia di maniglioni per porte in legno, alluminio, vetro

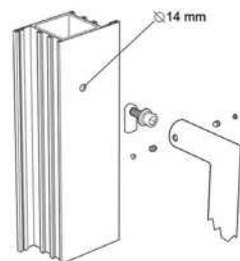

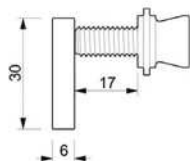

Fixing kit for pair pull handle for wooden, aluminium and glass doors

Befestigungsset für Stoßgriffpaar für Holz-, Aluminium-, Glastüren

Set de montage de poignée par pair pour portes en bois, aluminium, verre

€ 6,00

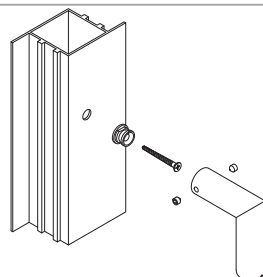

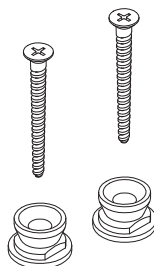

KIT 06

Kit di fissaggio per maniglione singolo per porte in alluminio profilo monocamera
fixing kit for single pull handle for aluminium doors single chamber system profile
Befestigungsset für Stoßgriff einzeln für Aluminiumtüren Einzelkammer System DE
Kit de montage pour poignée de tirage individuel pour portes en aluminium chambre unique

€ 15,00

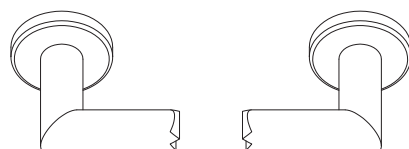

KIT 07

Kit di fissaggio per maniglione singolo non passante per porte in legno e alluminio
Fixing kit for single pull handle for wooden doors and aluminium
Montageset für Stoßgriff einzeln ohne Durchgangsbefestigung für Holztüren und Aluminium
Kit de montage pour poignée de tirage individuel fixation en facade pour portes en bois et en aluminium

€ 1,50

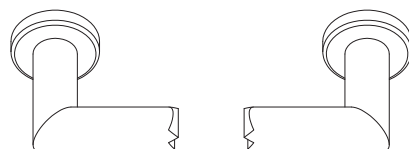

KIT 08

Kit di fissaggio per maniglioni con rosette Ø 60x10 per antinfortunistica
Fixing kit for pull-handles with roses Ø 60x10 mm
Befestigungsset für Stoßgriffe mit Rosetten Ø 60 x 10 mm (für Arbeitsschutz)
Kit de montage pour poignée de tirage avec rosaces Ø60x10 mm

€ 18,50

KIT 09

Kit di fissaggio per maniglioni con rosette Ø 50x7
Fixing kit for pull-handles with roses Ø 50x7 mm
Befestigungsset für Stoßgriffe mit Rosetten Ø 50 x 7 mm
Kit de montage pour poignée de tirage avec rosaces Ø 50x7 mm

€ 8,50

ANTIGERM™

COS'È: è il progetto antibatterico esclusivo in licenza a TROPEX design a base di resina composta da IONI D'ARGENTO e vernice all'acqua (senza solventi chimici). È LA SOLUZIONE innovativa al problema contaminazione da Virus-Batteri-Germi.

PERCHÉ IL PROGETTO: le statistiche indicano tra le principali cause di malattia proprio la contaminazione da contatto con batteri (ormai sempre più resistenti alle cure antibiotiche) che vivono e si coltivano sulle superfici di contatto più comunemente usate dalla popolazione. Nelle cliniche, nelle scuole, negli asili, nei luoghi privati e pubblici in genere, le maniglie sono continuamente azionate da più persone e sulla loro superficie si depositano e si coltivano batteri e germi che, in funzione del diverso grado di reazione del sistema immunitario che ogni soggetto umano possiede a diverso titolo, possono essere causa di stati di malattia più o meno gravi fino a provocare la morte nei soggetti più deboli. TROPEX design ha scelto la tecnologia a più alta efficacia con il minor costo per il prodotto finito.

COME FUNZIONA: Gli Ioni d'Argento vengono rilasciati lentamente dalla superficie Antigerm™ inibendo lo sviluppo dei batteri e provocandone la pressoché totale eliminazione (oltre il 99,99%)
Questo trattamento è stato **CERTIFICATO** dai laboratori inglesi dell'autorevole IMSL Ltd secondo la normativa **ISO 22196** (Determination of Antibacterial Activity).
Previene, combatte ed elimina più di 650 specie di virus, tra cui i più conosciuti e pericolosi
Escherichia Coli
Staphylococcus Aureus
Staphylococcus Aureus Methicillin-Resistant (MRSA)

DURATA: L'attività del trattamento Antigerm™ è permanente e per tutta la vita utile del prodotto, 24 ore su 24, 7 giorni su 7, senza bisogno di essere rigenerato. Anche in caso di scalfittura della superficie gli ioni d'argento possiedono capacità di influenza garantendo l'attività antibatterica come dimostrato dai test di laboratorio.

RESISTENZA DELLA SUPERFICIE:
resistenza alla corrosione salina: oltre 1.000 ore (+ 66% rispetto a finitura Lucido Verniciato);
resistenza alla prova d'usura accelerata (sfregamento abrasivo*): oltre 4 volte la durata della finitura Lucida Verniciata senza trattamento Antigerm™.

IDENTIFICAZIONE: le maniglie e gli accessori con rivestimento Antigerm™ sono marchiati con il logo  attraverso un sistema a laser che lo rende indelebile.

GLOBALITÀ, COMPLETEZZA, ESTETICA: a differenza di altre superfici e materiali antibatterici, Antigerm™ offre il vantaggio di essere cromaticamente neutro e trasparente, potendo così essere applicato su qualsiasi finitura lasciandone inalterati tonalità e colore.

PERCHÉ SCEGLIERE Antigerm™: si può affermare che Antigerm™, rispetto a bronzo, titanio e argento applicato in galvanica, offre una protezione antibatterica maggiore al prezzo minore.

SENSIBILITÀ, RESPONSABILITÀ, PRESTIGIO: prevenire il virus è una norma igienica di base. Installare Antigerm™ è dimostrazione di sensibilità e responsabilità soprattutto verso i soggetti più deboli come bambini, persone anziane e/o con difese immunitarie indebolite.
Per i responsabili di strutture in genere aperte al pubblico, installare Antigerm™ è dimostrazione di responsabilità verso la salute pubblica.
Pubblicizzare l'utilizzo di Antigerm™ significa dare maggior prestigio alla propria struttura/abitazione.

www.antigerm.it

WHAT IS IT?: Is the REGUITTI exclusive antibacterial project, based on resin composed of silver ions and water based varnish (no presence of chemical solvents). It is an innovative **SOLUTION** to the contamination problem of viruses, bacteria and germs.

WHY THE PROJECT: statistics indicate among the most common causes of disease, the contamination with bacteria (more and more resistant to antibiotic treatment) that live and grow more commonly over the contact surfaces used by people. Clinics, schools, nurseries, private and public places in general, are the places where door handles are continuously activated by several people and on their surface bacteria and germs are deposited and grow. According to the different reaction of the immune system of each human being, for various reasons, they may be the cause of serious illness that can lead to death in the weakest subjects; REGUITTI has invested in research and development recruiting specialized chemical staff, entrusting laboratories of research, and exploring the panorama of antibacterial technologies to compare the different solutions found.

HOW DOES IT WORKS: The silver ions are released slowly from the Antigerm™ surface, inhibiting the growth of bacteria and causing almost their complete elimination (99.99%).
The treatment has been **CERTIFIED** from the British laboratories of the prestigious IMSL Ltd, in accordance with the regulations ISO 22196 (Determination of Antibacterial Activity).
It prevents, fights and eliminates more than 650 species of viruses, including the most popular and dangerous:
Escherichia coli,
Staphylococcus Aureus
Methicillin-resistant Staphylococcus aureus (MRSA)

LASTING: The activity of Antigerm™ treatment is permanent, throughout the useful life of the product, 24 hours per day and 7 days a week, without needing to be regenerated.
Even with enhanced scratches on the surface, the silver ions have the ability to continue their influence ensuring the antibacterial activity as demonstrated by the laboratory tests.

RESISTANCE OF SURFACE: resistance to salt corrosion: over 1,000 hours (+ 66% compared with polished lacquered finish); proof of accelerated wear resistance (abrasive friction*): more than 4 times the duration of polished lacquered finish without Antigerm™ treatment.

IDENTIFICATION: The handles with Antigerm™ coating are branded with the  logo, through a laser system that makes it indelible.

GLOBAL, COMPLETENESS, AESTHETIC: Unlike other antibacterial surfaces and materials, Antigerm™ offers the advantage of being color-neutral and transparent, so it can be applied over any finish, leaving unchanged their tone and color.

WHY CHOOSING ANTIGERM™: we can affirm that Antigerm™, compared to bronze, titanium or galvanic silver coating, provides the higher antibacterial protection at the lowest price.

SENSITIVITY, RESPONSIBILITY, PRESTIGE: to prevent viruses is a basic hygiene rule. Installing Antigerm™ is a demonstration of sensitivity and responsibility, especially to the weakest as children and elderly or sick people with weakened immunity defenses.
For those who are responsible of facilities open to the public in general, installing Antigerm™ is a demonstration of responsibility for the public health. Publicizing the use of Antigerm™ means give more prestige to your facility home.

* Rapporto di prova Commissione n°149 della Sala Prove e Controlli Reguitti S.p.A
Test report No. 149 of the Commission and Controls Product Testing Laboratory Reguitti SpA

ANTIGERM™

WAS IST DAS? Es ist das exklusive, antibakterielle Projekt von Troplex Design auf Grundlage von einem Harz, der aus Silberionen und einem Wasseranstrich besteht (Ohne chemische Lösungsmittel). Es ist die innovative Lösung gegen Viren, Bakterien und Keime.

WARUM DIESES PROJEKT: Die Statistiken zeigen, dass eine Hauptursache von Krankheiten der Kontakt mit Viren, Bakterien und Keimen ist. Die Bakterie (die immer häufiger gegen Antibiotika resistent sind) leben und wachsen auf Kontaktflächen, die häufig von Personen benutzt werden. Insbesondere Tür- und Fenstergriffe werden in öffentlichen Gebäuden sehr stark von vielen verschiedenen Personen kontaktiert und sind somit Überträger der Viren, Bakterien und Keime. Die von Troplex Design angewandte Technologie zeichnet sich durch Effektivität und einem günstigen Preis aus.

WIE ES FUNKTIONIERT: Die Silberionen der Oberflächenbeschichtung Antigerm werden dauerhaft von der Oberfläche freigesetzt und hindern somit die Bakterien am Wachstum, bzw. sorgen so für die gänzliche Eliminierung (mehr als 99,99%). Das Antigerm Verfahren wurde von dem renommierten, englischen Labor IMSL LTD. auf Basis der Norm ISO 22196 (Determination of Antibacterial Activity) geprüft. Antigerm bekämpft mehr als 650 verschiedene Virusspezies

DAUER: Die Beschichtung ist dauerhaft und die Silberionen sind auch bei Kratzern und Schrammen auf der Oberfläche aktiv, wie Tests in dem Labor ergeben haben. Die Antigerm Beschichtung ist um 66% haltbarer als handelsübliche Lackierungen bei salzigen Ätzungen und die Kratzresistenz ist 4mal so hoch.

WIDERSTANDSFÄHIGKEIT DER OBERFLÄCHE: Widerstandsfähigkeit gegen salzigen Ätzung: mehr als 1.000 Stunde (+ 66% im Vergleich zur Blanken Lackierten Oberfläche). Widerstandsfähigkeit gegen der Untersuchung zur Abnutzung (Scheuerreibung*): mehr als 4 Male der Dauer von Blanken Lackierten Oberfläche ohne Antigerm Behandlung.

IDENTIFIZIERUNG: Die Tür- und Fenstergriffe, sowie die Zubehörteile, sind mit dem Antigerm Markenzeichen gekennzeichnet. 

GESAMTHEIT, VOLLSTÄNDIGKEIT, ÄSTHETIK: Im Unterschied zu anderen Oberflächen mit antibakteriellen Materialien bietet Antigerm den Vorteil, farblich neutral und durchsichtig zu sein. Demnach kann Antigerm für alle Oberflächen verwendet werden, ohne den Farbton zu verändern.

WARUM WÄHLEN Antigerm™ AUS: Antigerm bietet einen höheren antibakteriellen Schutz zu einem günstigeren Preis im Vergleich zu Blei, Titan, oder galvanischer Silberschicht.

FEINGEFÜHL, VERANTWORTUNG, ANSEHEN: Die Virusverhütung ist eine Grundnorm der Hygiene. Die Benutzung von Antigerm™ ist einen Beweis von Feingefühl und Verantwortung vor allem den Kindern, den alten Menschen und den Menschen mit schwacher Wehr entgegen. Antigerm™ einbau in öffentlichen Gefügen ist auch einen Beweis von Verantwortung der allgemeinen Gesundheit entgegen. Die Antigerm™ Verwendung gibt ein größeres Ansehen zu dem eigenen Gefüge/Haus.

www.antigerm.de

QU'EST-CECI: C'est le projet antibactérien exclusif en permis à TROPEX design en résine synthétique composée par ions d'argent et vernis à l'eau (sans solvants chimiques). C'est la nouvelle **SOLUTION** au problème de la contamination des virus-bactéries-germes.

POURQUOI LE PROJECT : Les statistiques signalent que les causes principales de maladie sont dues au contacte avec bactéries (toujours plus résistent aux traitements antibiotiques) qui vivre sur les surfaces de contact plus utilisée par le personnes. Dans les cliniques, écoles, asiles, lieux publics et privés, les poignées sont continuellement actionnées par plusieurs personnes et sur leur surface il se dépôt bactéries et germes, qui peut être la cause des maladies plus au moins sérieux, jusqu'à ce que causer la mort des personnes les plus vulnérables. TROPEX design choisi la technologie avec la plus haute efficacité avec le plus bas coût pour les produits finis.

LE FONCTIONNEMENT : Les ions d'argent sont libérés lentement de la surface Antigerm pour arrêter le développement des bactéries, causant la presque total élimination (plus que le 99,99%). Ce traitement a été **CERTIFIÉ** par les laboratoires anglais IMSL LTD selon la normative ISO22196 (Determination of Antibacterial Activity). Empêche, combats et élimine plus de 650 espèces de virus parmi les plus connus et dangereux :
Eschelinia Coli
Staphylococcus Aureus
Staphylococcus Aureus Methicillin-Resistant (MRSA)

DURÉE : L'activité du traitement Antigerm est permanent et pour tout la vie des produits, 24 heures sur 24, 7 jours sur 7, sans avoir besoin d'être régénéré. Bien que la surface du produit est abimée, les ions d'argent continuent l'activité antibactérien ainsi que démontré dans les test de laboratoire.

RÉSISTANCE DE LA SURFACE :
Résistance à la corrosion saline : plus de 1000 heures (66% en plus par rapport à la finition verni normal)
Résistance à l'abrasion : 4 fois la résistance des produits vernis normal (sans traitement Antigerm)

IDENTIFICATION : Tout le produits sont marqués avec  Antigerm avec système de laser, ce qui le rend indélébile.

GLOBALITÉ, INTÉGRALITÉ, ESTHÉTIQUE : Contrairement à les autres surfaces et matériaux antibactériens, Antigerm offre l'avantage d'être chromatiquement neutre et transparent, pourraient être appliqué à tout les surfaces, lassaient inchangés les teintes et couleurs.

POURQUOI CHOISIR ANTIGERM : On peut affirmer que Antigerm, par rapport à bronze, titan et argent utilisé dans la galvanique, offre une plus grande protection antibactérien au coût les plus bas.

SENSIBILITÉ, RESPONSABILITÉ, PRESTIGE : empêcher les virus est une norme d'hygiène de base. Installer Antigerm est un signal de sensibilité et responsabilité surtout pour les plus vulnérables, les enfants, personne âgée et avec les défenses immunitaires faibles. Pour les responsables des structures ouverts au public, l'installation de Antigerm est une confirmation de responsabilité vers la santé publique. Annoncer l'utilisation de Antigerm signifie donner du prestige à votre maison/ structure.

* Prüfbericht n.149 der kommission und der produktprüfung Testing Laboratory Reguitti S.p.a.
Rapport d'essai n.149 de la Commission et des contrôles des produits Testing Laboratory REGUITTI SpA

La prima gamma di maniglie e accessori con protezione antibatterica, completa e ricca, capace di soddisfare ogni tuo desiderio di bellezza e al tempo stesso di igiene.

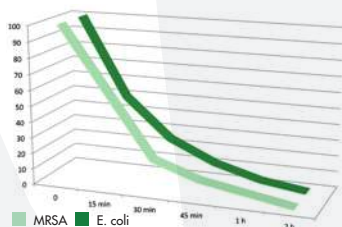

Grazie a un trattamento esclusivo, **AntiGerm** garantisce l'eliminazione dei germi rendendo il mondo dove vivi più protetto e sicuro.

Ideale per situazioni dove l'igiene è un requisito fondamentale come ad esempio asili nido, scuole materne, ospedali, cliniche e case di cura, è anche altamente consigliabile per casa tua. Infatti AntiGerm è un trattamento possibile su ogni articolo Reguitti, che rende il tuo appartamento un luogo sano dove vivere.

AntiGerm uccide più del 99,99% dei germi. L'efficacia dell'azione antibatterica è stata scientificamente testata.

COME FUNZIONA?

Grazie allo speciale trattamento AntiGerm gli ioni di argento vengono rilasciati lentamente uccidendo (o inibendo lo sviluppo) di virus e batteri. Lo ione, assolutamente sicuro per l'uomo, penetra attraverso le pareti dell'organismo microbico, ne blocca la riproduzione attaccando il DNA, ed infine impedisce la respirazione della cellula. In pochi minuti possono essere in tal modo uccise oltre 650 specie batteriche tra cui Legionella, Escherichia Coli, Salmonella e MRSA. Le maniglie AntiGerm lavorano 24 ore al giorno 7 giorni su 7 riducendo il livello dei batteri di oltre il 99,99%, senza che tu debba fare assolutamente nulla.

La nostra salute inizia da ciò che tocchiamo.

Prove di laboratorio effettuate dall'autorevole IMSL (Industrial Microbiological Services Ltd) secondo la norma ISO 22196, dimostrano l'efficacia di AntiGerm in grado di uccidere oltre 650 specie batteriche.

The first complete and rich range of handles and accessories with antibacterial protection capable of satisfying your beauty desires and both hygienic needs.

Thanks to an exclusive treatment of silver ions AntiGerm ensures germs elimination making your world more protected and secure.

AntiGerm treatment is the ideal solution where hygiene is an essential requirement, for example in childhood centres, kindergartens, nurseries, schools, hospitals, clinics, health home and last but not least your home. AntiGerm is a treatment which turns your home in a sound place to live.

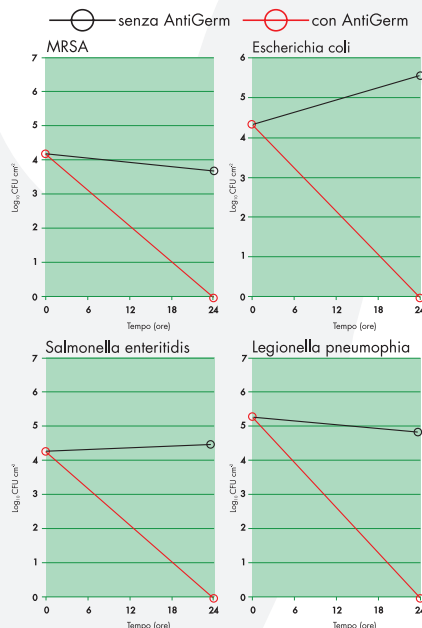

HOW DOES IT WORK?

Thanks to special AntiGerm treatment the silver ions are slowly released killing viruses and germs.

The silver ion, absolutely safe for humans, attacks viruses DNA, blocking cells breathing and preventing its reproduction. In few minutes more than 650 germ species as escherichia coli, legionella pneumoiniae, salmonella enteritidis... can be killed. AntiGerm handles work 24/7 reducing Bacteria level of 99,99% without your effort.

Our health begins where we touch.

ANTIHERM È UN BRAND DEL GRUPPO REGUITTI PER I PRODOTTI DI:

Die erste vollständige und reichhaltige Linie von Türgriffen und Zubehör mit antibakteriellem Schutz, welche im Stande ist, gleichzeitig Ihre Wünsche in Ästhetik sowie hygienische Anforderungen zu vereinen.

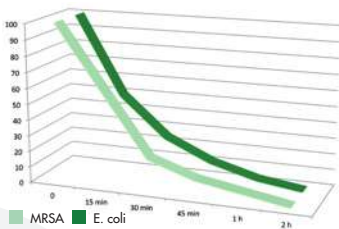

Dank einer exklusiven Behandlung von Silberionen gewährleistet AntiGerm die Eliminierung von Keimen und bietet so mehr Schutz und Sicherheit.

Das AntiGerm Verfahren ist die ideale Lösung, wo Hygiene eine wesentliche Voraussetzung ist, zum Beispiel in Kindergärten, Kindertagesstätten, Schulen, Krankenhäusern, Kliniken, Gesundheitsstätten und nicht zuletzt in Ihrem Zuhause. AntiGerm ist ein Verfahren, dass Ihr Zuhause in einen hygienischen Lebensort verwandelt.

AntiGerm tötet 99,99% der Erreger.
Die antibakterielle Wirksamkeit wurde wissenschaftlich durch ISML – Industrial Microbiological Services Limited nach ISO 22196 getestet

Wie funktioniert es?

Durch das von JATEC speziell entwickelte AntiGerm Verfahren werden Silberionen langsam freigesetzt, um Viren und Bakterien abzutöten.

Die Silberionen, welche für Menschen absolut unbedenklich sind, greifen die DNA von Viren an, blockieren die Zellatmung und verhindern dadurch ihre Vermehrung.

In wenigen Minuten können mehr als 650 Keimarten wie Escherichia Coli, Legionellen Pneumoniae, Enteritis-Salmonellen etc. abgetötet werden. AntiGerm Griffe arbeiten ohne Ihr Zutun 24/7, Bakterien um 99,9% zu reduzieren.

Unsere Gesundheit beginnt dort, wo wir berühren.

VISORE DIGITALE CLASSIC

WISO.51.23

Article Code	Finishes Display / Camera	Price
WISO.51.16	Argento / Cromo lucido Matt Chrome / Bright chrome	€ 122,50
WISO.51.23	Oro / Ottone lucido Gold / Polished brass	€ 122,50
WISO.51.26	Champagne / Ottone lucido Champagne / Polished brass	€ 122,50

Caratteristiche:

1. Spioncino grandangolare superiore alla media
2. In dotazione n° 3 prolunghes da 40 a 65 - da 65 a 90 - da 90 a 110 mm
3. Per qualsiasi foro porta da 14-22 mm
4. Sensore da 1,3 MEGA PIXEL CMOS
5. Schermo LCD 3,5"
6. Alimentazione: 4 batterie AA in dotazione
7. Dimensioni 136x86x25 mm, Peso:360 g

Specifications:

1. Wide viewing angle digital door viewer
2. Suitable for door thickness from 40 to 65 - 65 to 90 - 90 to 110 mm
3. Fits door holes from 14mm to 22 mm
4. 1.3 MEGA PIXEL CMOS sensor
5. LCD display 3.5
6. 4 pcs. AA batteries (included)
7. Size 136x86x25 mm - Weight: 360 g

Merkmale:

1. überdurchschnittliches Weitwinkelobjektiv des Türspions
2. Ausgerüstet mit n. 3 Verlängerungsschnur von 40 bis 65 – von 65 bis 90 – von 90 bis 110 mm
3. Für alle Türlöcher von 14-22 mm
4. Messfühler von 1,3 MEGA PIXEL CMOS
5. LCD 3,5" Bildschirm
6. Beschickung: 4 Batterien AA (ausgerüstet)
7. Dimensionen 136x86x25 mm, Gewicht: 360 g

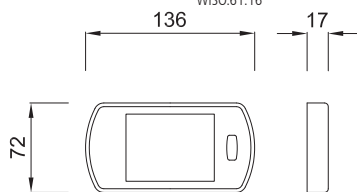

Caractéristiques:

1. Judas de porte numerique grand angle
2. Inclus n. 3 extensions pour portes de 40 à 65 - 65 à 90 et 90 à 110 mm
3. Pour portes avec trou de 14 à 22 mm
4. Capteur de 1,3 MEGA PIXEL CMOS
5. Écran LCD 3,5 "
6. Alimentation: 4 piles AA (compris)
7. Dimensions 136x86x25 mm - Poids: 360 g

TROPEX inox evolution, simbolo di innovazione dei prodotti Tropez Design ottenuti da materiali nobili e pregiati quali gli acciai inossidabili. Frutto di culture diverse, sostenute da esperienze ed innovazioni, le nostre idee e di nostri progetti rispondono alle esigenze del mercato in continua evoluzione, risolvendo le sfide che la tecnologia contemporanea ci indica. All'esperienza pluridecennale nelle lavorazioni dei vari metalli, il nuovo e dinamico team della Tropez Design presenta la lavorazione degli "eterni inossidabili".

TROPEX inox evolution symbol of innovation of the products Tropez Design obtained from noble and precious materials such as stainless steel. the result of different cultures, supported by experiences and innovations, our ideas and our projects meet the needs of the changing market, solving the challenges that contemporary technology shows us. Decades of experience in the manufacturing of various metals, the new and dynamic team of Tropez Design introduced the production of the "eternal stainlesses"

TROPEX inox evolution Symbol für Innovation der Produkte Tropez Design, die von edlen und kostbaren Materialien wie Edelstahl erhalten werden. Unsere Ideen und Projekte, die die Ergebnisse der verschiedenen Kulturen, Erfahrungen und Innovationen sind, entsprechen den Marktanforderungen und lösen die Herausforderungen, die die moderne Technologie uns zeigt. Jahrzehntelange Erfahrung in der Verarbeitung der verschiedenen Metallen, führte das neue und dynamische Team von Tropez Design zu den Produktion der "zeitlosen nicht Oxidierende".

TROPEX inox evolution symbole de l'innovation des produits Tropez Design obtenus à partir de matériaux nobles et précieux tels que les aciers inoxydables. Le résultat de différentes cultures, soutenus par des expériences et des innovations, nos idées et nos projets répondent aux besoins du marché en constante évolution, en résolvant des défis que la technologie moderne nous montre. Décennies d'expérience dans le traitement de divers métaux, la nouvelle et dynamique équipe de Tropez Design ont présenté les travaux de «les éternels inoxydables».

	C%	Mn	Cr	Ni	Mo
AISI 304	0,08 max	2 max	18 - 20	8 - 12	-
AISI 316	0,08 max	2 max	16 - 18	10 - 14	2 - 3

Gli "inossidabili" utilizzati garantiscono la massima resistenza alla corrosione secondo le tabelle:

The "eternal stainlesses" used ensure maximum corrosion resistance according to the tables:

Die verwendete "zeitlose nicht Oxidierende" versichern die maximale Korrosionsbeständigkeit nach den Tabellen:

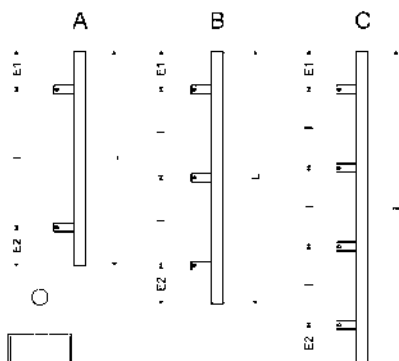

Les «éternels inoxydables» utilisés garantissent la maximale résistance à la corrosion selon les tableaux:

- Aisi 304-EN10088 - 3:1.4301X5 CrNi 18-10

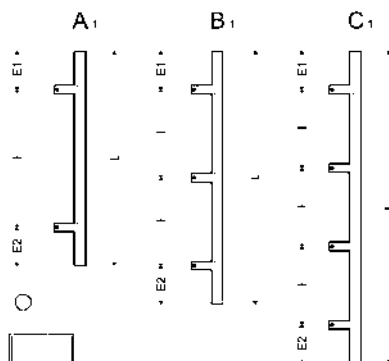

- Aisi 316-EN10088 - 3:1.4404X2 CrNiMo17-12-2
